SHREENIJA VADAYAR

Creative Technologist | Experiential Design | Visual Storytelling

Denver, CO | shreenijacreates@gmail.com | linkedin.com/in/shreenija-vadayar

SUMMARY

Recent B.S. Creative Technology & Design graduate and multidisciplinary designer who develops concepts into immersive experiences, visual systems, physical products, and audience-facing installations. Combines visual storytelling, experiential design, creative technology, fashion and textiles, fabrication, and project coordination to carry ideas from concept through production and presentation. First Prize winner of the Autodesk Make it Wearable Engineering Student Contest.

CREATIVE SKILLS

Design & experiential: Experiential and installation design, exhibition design, visitor experience, visual storytelling, creative and art direction, concept development, moodboards

Fashion, textile & object design: Garment construction, sewing, pattern drafting and modification, textile and material exploration, fashion illustration, upcycling, styling, physical product design

Creative technology & production: Interactive design, physical computing, Arduino, Unity, lighting design and production, sound production, fabrication, 3D printing, laser cutting

Creative operations & tools: Project and production coordination, schedule management, presentation development; Adobe Illustrator, Photoshop, InDesign, SolidWorks, SketchUp

SELECTED CREATIVE EXPERIENCE

Woven Voices: Interactive Wearable Technology Installation *Senior Capstone, Solo | Sept 2024 – May 2025*

Lead Designer & Developer

- Designed and built a solo wearable installation of seven mechanical, lotus-inspired flowers, designed to bloom and brighten as visitors approach and wilt and dim as they move away. First Prize, Autodesk Make it Wearable Engineering Student Contest.
- Developed the visual concept and narrative around human connection, adversity, healing, and support, drawing inspiration from designers including Iris van Herpen and Yin Gao.
- Designed the garment, color palette, textiles, materials, visual language, and flower aesthetics around lotus symbolism, working through moodboards, sketches, renderings, and 3D models before fabricating the final piece.
- Engineered the interactive system (VL53L0X distance sensors, Adafruit Trinket M0 boards, NeoPixel LEDs, micro servos), then programmed, tested, and refined it. Presented at the 2025 CU Boulder Design Expo, engaging 25+ visitors.

Virtual Reality Drawing Environment: Interactive 3D Experience *University of Colorado Boulder*

- Independently built an interactive environment from scratch in Unity for a Meta VR headset, where users draw and explore color in 3D space.
- Implemented drawing and erasing tools, a palette and color wheel, and drawable surfaces including mannequins and a drawing board.

Black Box Theater: Production & Experiential Design *Production Team | Oct 2023 – May 2025*

- Supported about 10–15 live productions across lighting, sound, backstage operations, setup and breakdown, and performer and presenter coordination.
- Programmed and operated theatrical lighting cues for color changes, dimming, spotlights, timing, and scene transitions, triggering cues manually during performances as needed.
- Prepared and adjusted lighting systems across the catwalk and grid, including gobos, color, and fixture positioning, and completed pre-show technical checks; supported sound through track changes and cue coordination.
- Explored projection mapping, 360° projection, and motion capture as emerging tools for experiential and performance design.

Fashion, Textile & Upcycling Projects *Independent Creative Practice | Ongoing*

- Design and construct original garments through pattern drafting, fitting, machine and hand sewing, and finishing, from initial concept through finished construction.
- Modify and upcycle existing garments through deconstruction, reconstruction, and pattern changes, including completed reconstructed garments and ongoing projects.
- Explore color, texture, silhouette, and draping across tulle, chiffon, cotton, muslin, linen, and polyester; blend Indian and Western influences to explore cultural identity through fashion.

Art Direction & Creative Production *Independent Creative Practice | 2023 – Present*

- Develop and direct fashion, editorial, dance, and cultural photography concepts from idea through production, using moodboards to set styling, location, color, composition, and mood across 10+ creative shoots.
- Lead production by sourcing and styling looks, coordinating photographers, models, and collaborators, managing schedules and locations, and directing on-set execution.
- Creative Director and model for a culturally informed 1990s-inspired editorial published in BLAZE Magazine (October 2023).

Drishti Tea: Conceptual Brand & Packaging Design *University of Colorado Boulder*

- Translated personal identity and Indian-American cultural influences into a conceptual tea brand and packaging system, developing the visual direction through moodboards, typography, color, patterns, and motifs.
- Designed packaging graphics and applied them to a 3D tin model, then created the final 3D visualization in Illustrator, Photoshop, and InDesign.

Creative Project Coordination: Multidisciplinary Design & Performance Projects *University of Colorado Boulder | 2023 – 2025*

- Coordinated projects and live productions across teams of 3–20, setting up communication channels, master schedules, task assignments, check-ins, and rehearsal plans.
- Reorganized a cross-disciplinary team struggling with competing schedules by creating a shared calendar, consolidating deadlines, and setting clear expectations; the team finished the semester with A grades.

PROFESSIONAL EXPERIENCE

Tecomet: Engineering Intern / Co-Op *Boulder, CO | June 2022 – July 2023*

- Coordinated engineering documentation and design updates across Engineering, Manufacturing, and Quality; prepared for client meetings, documented decisions, and followed up on action items.
- Revised and maintained 50+ engineering documents supporting 20–25+ parts orders while coordinating 2–3 concurrent workstreams.

Simple Switch (ethical marketplace): Growth & Outreach Intern *May 2021 – August 2021*

- Coordinated outreach and partnership development for an ethical marketplace connecting customers with small businesses.
- Researched and curated potential partners, collaborators, and creators for social media, marketing, PR, and product-trial initiatives, building a network of 25–35 prospective contacts.
- Conducted outreach that contributed to onboarding two new product vendors while working closely with a small startup team.

EDUCATION

University of Colorado Boulder *May 2025*

B.S. Creative Technology & Design | Minors: Business & Entrepreneurship; Leadership Studies

Women's Startup Program, Management & Entrepreneurship Certificate, IIM Bangalore (NSRCEL) & Goldman Sachs
